

PLANNED POWER OUTAGE

PLANNED POWER OUTAGE: Alliant has informed us of an electric outage that will happen on Sunday May 19th from 01:00am-03:00am. The reason for the outage is ITC, the company that takes care of the transmission lines, needs to change out a pole that feeds our Substation in Roland. Alliant Energy will be sending out a phone call to everyone in Roland informing them of the outage as well.
